Esslingen University of Applied Sciences offers a lot more than just academics.

- university athletics
- university orchestra or choir
- Rennstall and E-Stall (Formula 1 workshops)
- paragliding

The city of Esslingen lies within a short distance from the federal state capital, Stuttgart in Baden-Württemberg, Germany. With a StudiTicket (VVS) you can easily reach interesting cultural sites in the region. Numerous international companies are located in Esslingen, such as Daimler, Eberspaecher and Festo. Esslingen’s historical city center with its cozy half-timbered houses and its lively culture and arts scene provide an ideal environment for your academic studies.

Watch our latest movie on youtube: “welcome to the faculty of management”
The automotive industry and its numerous suppliers have enormous development potential in the forward-looking area of sustainable mobility. This requires experts who are able to build bridges between technology and management know-how and can mesh different company operations and departments. Your areas of responsibility will be accordingly varied and multifaceted.

At Esslingen University of Applied Sciences, we not only provide specialist and methodological knowledge – we focus on social competences, too. These are often crucial in today’s professional life. Modern project work and interactive learning methods, such as company simulations, help you develop these skills. Through regular lectures and discussions with experienced professionals from business and administration, you will gain first-hand insights into today’s key issues.
