

<b>MBA Module:</b>	<b>Information Technology</b>
<b>Key words:</b>	Enterprise Resource Planning, Information Technology, Market and Competitive Intelligence
<b>Module number:</b>	
<b>Target group(s):</b>	1 <sup>st</sup> and 2 <sup>nd</sup> semester MBA students (ca. September - June)
<b>ECTS credits:</b>	6
<b>Language of instruction:</b>	English
<b>Responsible:</b>	Prof. Dr. Michael Flad

**Extent of work (hours)**

Workload	Contact hours	Self study	Exam preparation
180	90	30	60

<b>Prerequisites:</b>	Participants should be able to prepare presentations using MS-Powerpoint.
<b>Objectives:</b>	This module is designed to provide the student with a broad overview of information and communication technology (ICT) and its role in the modern enterprise. Taking a managerial point of view, it is demonstrated how technology can provide a strategic advantage by increasing productivity and quality, improving customer service, enhancing collaboration, and enabling business reengineering. The student will get a conceptual overview of ICT.
<b>Module content:</b>	The module covers the following three courses: <ul style="list-style-type: none"> <li>• Enterprise Resource Planning</li> <li>• Information Technology</li> <li>• Market and Competitive Intelligence (MCI)</li> </ul>
<b>Applicability:</b>	This module lays the groundwork for the corporate project and the master's thesis where IT issues are essential next to other disciplines.
<b>Requirements for credits:</b>	Information Technology: presentation (60 minutes) Enterprise Resource Planning: presentation (30 minutes) Market & Competitive Intelligence: study assignment and presentation  All three exams must be passed in order to receive the ECTS for the whole module.

<b>Contents:</b>	<p>Global growth perspectives are diminishing in the industrial world. Globalization leads to more competition and new competitors arise from Asia. The evaluation of markets and competitors becomes crucial for companies, if they want create opportunities, grow above the market and define sustainable competitive advantages.</p> <p>Therefore, companies need to set-up Market and Competitive Intelligence Centers which professionalize this task within companies. We will get to know the different organizational structures and set-ups of MCI centers. The right positioning of a MCI center is crucial for its success in an organization. Therefore, we will discuss the options that exist and the consequences of our choices with regard to tools and processes. The deliverables of MCI work need to match the needs of the varied stakeholders. The understanding of the capabilities of the multiple tools and methods will be deepened during the sessions of the course.</p> <p>A central platform is important for the automated gathering, analyzing and dissemination of the results of MCI specialists. We will have the opportunity to work with and experience „live“ a professional platform. This will allow us to specify the right criterias to evaluate the different suppliers and choose the best platform for our organization.</p> <p>A culture for open information flow from the markets to the MCI center needs to be created. You will learn about the right steps to create such a culture within your organization.</p>
