

ESSLINGEN

AN IDEAL PLACE TO LIVE

The city of Esslingen has a population of over 93,000 inhabitants, and lies nestled in the vineyards overlooking the Neckar valley. Stuttgart, the capital city of Baden-Wuerttemberg, is only 20 kilometres away.

Near the university, there are many hiking paths through the vineyards and forests that can be explored on foot, by bicycle or segway. Within the city, there are many parks, the city castle, waterways, street cafés and theatres. In the winter, the old city centre lights up with a Christmas market; in the summer, live music, open-air cinemas and artisan's markets make Esslingen come to life. Esslingen's historical city centre, with its half-timbered houses, its cafés and its diverse cultural life, is an ideal surrounding for a successful study time.

Esslingen has a history reaching back over 1,200 years, a history in which tradition and progress have gone hand in hand. Since its industrialisation, Esslingen has been a major centre for engineering education, and it is this mixture of technical prowess and cultural tradition that makes Esslingen an ideal place to study.

HOW TO APPLY

Esslingen University of Applied Sciences

Management and Technology

INTERNATIONAL INDUSTRIAL MANAGEMENT MBA

THE ESSLINGEN MBA

ENGINEERING & MANAGEMENT FOCUSED ON THE INDUSTRY

Esslingen University is one of the leading universities in Germany for applied sciences with core areas in engineering and management as well as applied research. We have developed a specialised and focused MBA, dividing the key learning areas into these three majors:

A FOCUSED MBA APPROACH

General Management

Focusing on entrepreneurial thinking and industrial management. Students learn to master key managerial and entrepreneurial skills and how to handle the multi-faceted challenges faced by multi-national companies.

A classical approach to MBA.

Sustainable Production & Technology

Centered around sustainable management concepts. Students learn how to effectively assess sustainable activities, and about the tools and methods used to establish a sustainable supply chain.

Digital Transformation

Examines the impact of integrated technology and smart manufacturing on company structures and procedures. Students learn how to manage these digitalisation strategies in relation to company goals and expectations.

MORE THAN ...

MORE THAN A TYPICAL MBA PROGRAMME

Esslingen MBA graduates work at the interface between technology and management. They are highly skilled business professionals, and are particularly sought after by German and global companies alike.

Pursuing the MBA in Esslingen is more than just an education. It is an experience that widens your horizons and puts you in an ideal position gain industry employment.
