

CFD Engineer as a Co-Founder (m/w/d)

WHO ARE WE?

We are committed to developing a Lightweight, Emission-free, vertical Take-off and Landing Aircraft. GründES! Is supporting this start-up. We are aiming to change the way we travel. We believe that it's possible by creating safer, faster, and Emission-free, vertical Take-off and Landing Aircraft. Flier wants to become the most innovative and advanced Aviation Start-up in the next six years around the world.

WHAT ARE WE LOOKING?

- You are a student/graduate from mechanical engineering with a background in computational fluid dynamics and can use STAR-CCM++, CATIA.
- You are interested in such a field.
- You are a great team player.
- You can work independently.
- You will be responsible for simulate different airfoil and fining Lift coefficient and Drag Coefficient.

WHAT DO WE OFFER?

By joining the team, you will be a part of the development of vertical Take-off and Landing Aircraft. You will work with the most diverse, creative, and innovative team around the world. You will be able to work on a project that will change the future of our transportation system. You will have the chance to design your concept and implement it in the real world.

If you are interested, please contact me. We will face the challenge together.
